Subject: Please support HB 5724 - Testimony

Dear Honorable Committee Members,

I am a Bridgeport, CT resident and a producer of a local access TV show and have learned a great deal of what goes on in the city of Bridgeport.

I urge you do use your good offices to support everything you can do to have the bill HB5724 get passed.

It is disturbing to me that unions may come out against this law. That is against their own best interest. There are many people including myself who want to and attempted to run for office, however, the people who are in control of politics in the city have made it very difficult to run and win office. I was given the wrong information when I was running for the democratic town committee and was unable to get enough signatures.

What is obvious to most people in Bridgeport, is that we need to separate those who work for city from those who serve on the city council. All decisions on the city council should be made based on the merit of the issue and not because someone or their relative works for the city.

Please support passing this bill and do whatever is necessary to support passing this bill HB 5724
